

Los Angeles Harbor College Registered Nursing Program Packets

The Nursing Packets for the LAHC Registered Nursing Program are very extensive and **MUST** be done correctly. Nurse Carole Stevenson reviews all nursing packets in the Student Health Center (Café 110) before they are turned in. Packets must be completed by the first day of classes. The following is what must be completed:

1. Titers

A **titer** is a blood test that measures the level of immunity a person has to a certain disease. So if the person is exposed to the disease, they will not be at risk for infection. For the nursing program, titers are required for the diseases Measles, Mumps, Rubella, Hepatitis B, and Varicella. Titers must be less than 5 years old upon entering the program.

2. Serology (RPR), CBC, and Urinalysis

A **serology**, also known as an RPR, is a blood test that screens for the disease syphilis. A **CBC** is a complete blood count and is also a blood test. The **urinalysis** is a urine test. These tests must be updated every 2 years by all nursing students.

3. Physical Exam

The physical exam is done by Dr. Traughber in the Health Center on Wednesdays between 10:00am – 12:00pm. Physicals must be updated every two years.

4. Tuberculosis clearance

- a. A 2-step TB skin test is required for all nursing students. The student receives the first TB test on one arm then receives another two-three weeks later on the opposite arm. Both TB tests must be read 48-72 hours after the shot is administered. A regular one-step TB test must be done yearly after the student has received a 2-step TB test. If the student has ever had a **positive** TB test, a chest x-ray is required for TB clearance. Chest x-rays must be updated yearly.

5. Vaccinations

- a. Hepatitis A, Influenza, H1N1 and TDAP (Tetanus) vaccines are required for all nursing students. Hepatitis A is a 2-dose series that is only performed once. Tetanus must be updated every 10 years. Influenza vaccines must be updated yearly.
- b. If a student has a negative titer, a booster vaccine must be given and another titer must be drawn 30 days later.

The entire nursing packet can be completed in the Student Health Center by Nurse Carole. If you have insurance or can get the tests done elsewhere, we **STRONGLY RECOMMEND** that you bring all paperwork and results to Nurse Carole for a final review of your packet.
