Growth in Online Degrees

Curriculum

- Five colleges in the LACCD are now offering online degrees.
- Seventy-four percent of the U.S. colleges surveyed in the 2008 Distance Education Survey offer online degrees.
- More Los Angeles Harbor College students who transfer to private colleges/universities in California transfer to the University of Phoenix than any other private college or university.
COMPETITION IN VIRTUAL SPACE SUMMARY

• Online classes and degrees are the fastest growing part of higher education (and soon, K-12 education).

• Our students see online programs as a viable choice in continuing their education.

• There will be increasing pressure to move from “online classes” to a “virtual campus”.
